FLIGHT OPERATIONS OFFICER/DISPATCH COURSE

1 WHY IS IT IMPORTANT?

Gain fundamental knowledge about aviation operations that you will need to succeed as flight operations officers or that will help you refresh and strengthen your flight operations and aircraft dispatch knowledge.

During this 5 days training, you will gain a better understanding of the organization of a flight operations department and gain practical skills for the tasks and responsibilities of flight operations officers.

That will contribute to better performance of duties and responsibilities at an Airline Operations Center (AOC).

The course design is based on ATR's dispatcher's course and follows ICAO standards as laid out in Doc 7192 part D3.

2 COURSE OBJECTIVES

Upon completion of this course you will be able to:

- Review regulatory requirements relating to flight operations
- Understand the role, goal and composition of operations manuals & (Master) Minimum Equipment Lists
- Outline physical principles that determine aircraft performance
- Perform weight and balance computations
- Describe the main aircraft systems
- Work with flight folders and undertake flight planning

3 WHO SHOULD ATTEND?

This is the right course for you if you are:

- Flight operations staff
- Ab initio staff in an Airline Operations Center (AOC)
- New hires as flight operations officers
- Flight support managers
- Flight crew members

US\$550 for
5 days

Key topics:

- Operations (OPS) manuals
- Minimum Equipment Lists
- Aircraft systems
- Aircraft limitation
- Weight & balance
- Meteorology
- Aircraft performance
- Payload computations
- Flight folders
- Flight planning
